👤 PROFILE

Strong in design and integration with intuitive problem-solving skills. Passionate about learning and implementing new projects. I have skills in JavaScript, React.js, and Node.js. I want to start my career as a full-stack web development engineer. I am curious about learning the latest technologies like Cybersecurity, Blockchain, and DevOps.

🧠 SKILLS

C++

PYTHON

HTML

CSS

JAVA SCRIPT

NODE.JS

REACT.JS

📁 PROFESSIONAL EXPERIENCE

03/2022 – present
India

HyperVerge Academy, *Full Stack Development Fellow*

- To face interviews and develop industrial skills I joined as a fellow
- Worked on four projects on JavaScript, three on React.js, and one on Node.js.
- As a part of the fellowship, I enhanced my professional skills, and leadership qualities through mentors and other learners.

01/2022 – 02/2022
United Kingdom

Blue Prism, *Virtual Internship*

- Learned about how robotic process automation (RPA) works.
- Worked on assignments and arithmetic programs on blue prism software

📁 PROJECTS

Blog Page 🔗

- This is an API and users can able to create a new blog and delete it.
- The app can generate a JWT token for the user to sign up.
- It uses the MongoDB database to save user details and blog information.

Password Generator 🔗

- The app can generate four unique passwords.
- It is built by using javascript, the user can customize the contents and length of the password

Chrome Extension 🔗

- Users can save the history of visited sites in the bookmark
- It uses local storage to save the record

Meme Generator 🔗

- It can take input text from the user and develop a meme with provided details.
- It builds by using React js that can render renewed memes with the same contents.

Quizzical API 🔗

- This is a simple quiz API that can test your general knowledge.
- It is developed by using React js to get the five questions from Trivia API and show no. of questions are correct.
